ANNUAL REPORT

FOR BETTER
CHANGE
(FOBEC)

ABOUT US

FOBEC is a youth-led organization dedicated to empowering youths to become global citizens, community leaders, developers and self-reliant individuals. Climate change is one of the key thematic areas as it has the power to hinder the potential of youths if not addressed. The Organization is based in Rumphi district in Malawi.

OUR VISION

"Empowering the youth of Rumphii District to become global citizens, community leaders, innovative developers, and self-reliant individuals by addressing key challenges such as climate change, fostering sustainable development, and creating a brighter future for all."

OUR MISSION

"To empower the youth of Rumphu District to become global citizens, community leaders, innovative developers, and self-reliant individuals through education, skills development, and community engagement. We are committed to addressing climate change and other key challenges, fostering sustainable development, and creating opportunities for youth to realize their full potential."

OUR VALUES

- **Empowerment:** We believe in equipping youth with the knowledge, skills, and opportunities they need to become self-reliant and impactful leaders.
- **Community Engagement:** We value the power of community and prioritize active participation, collaboration, and inclusivity in all our initiatives.
- **Innovation:** We encourage creativity and innovation, supporting youth in developing new ideas and solutions to address local and global challenges.
- **Global Citizenship:** We promote awareness and understanding of global issues, fostering a sense of responsibility and action towards creating a better world.

2023

ACHIEVEMENTS

We championed clean-up activities at Rumphu Urban, targeting 5 densely populated places such as the district hospital and marketplaces. Our work was featured in major media houses such as Times360 Online and Zodiak Online.

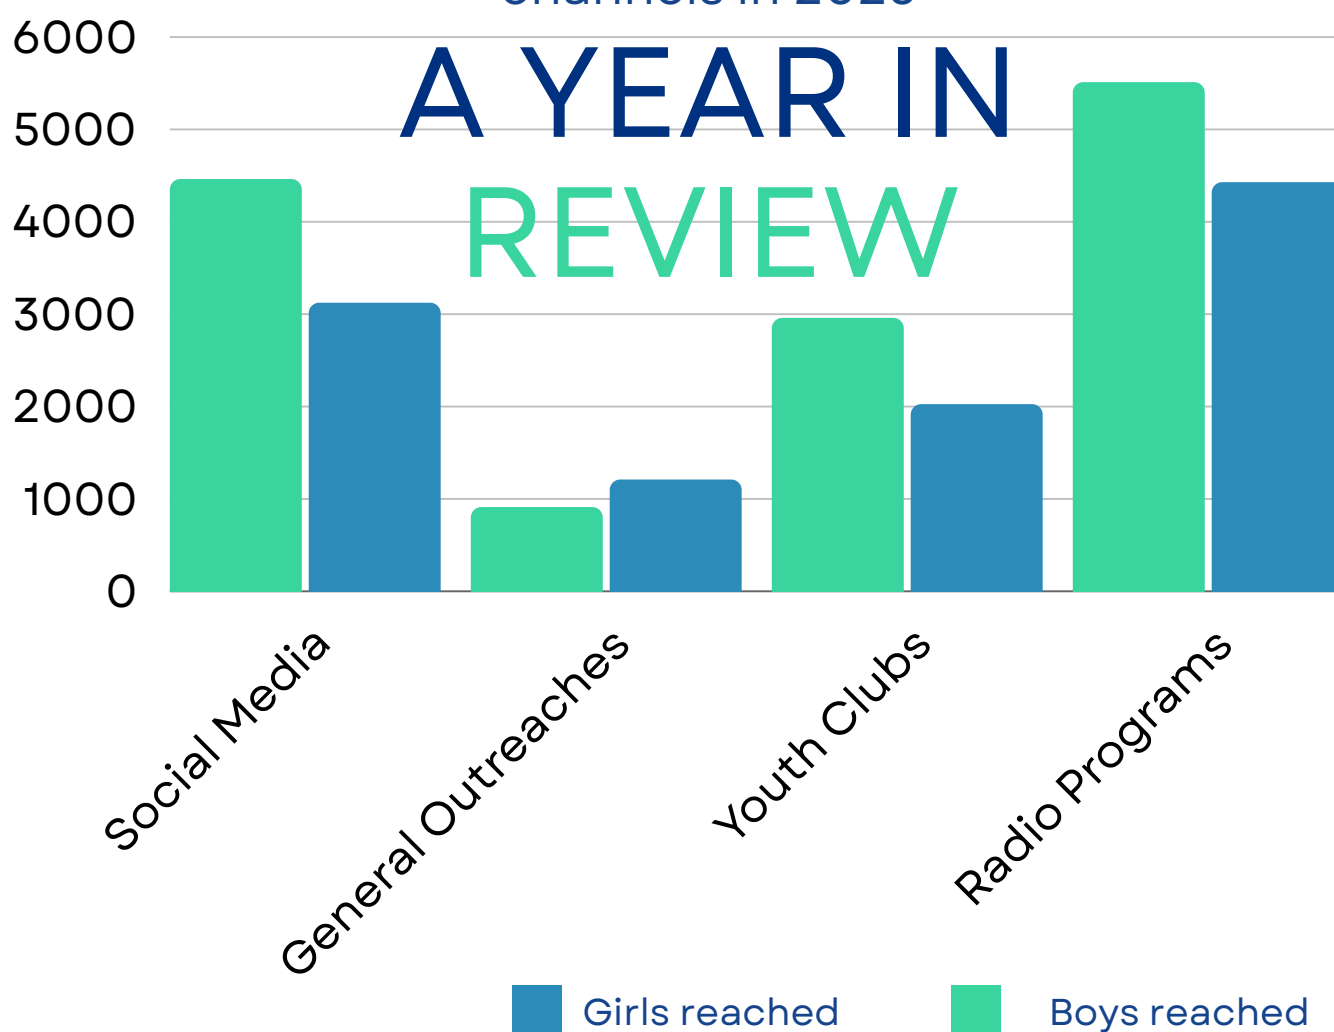

We also championed tree-planting activities targeting disaster-prone areas such as Mzokoto and Rumphu Urban. A total of 11,700 trees were planted in 2023 alone.

We conducted 16 awareness campaigns on climate change targeting youth clubs and secondary schools around Rumphu urban, Mzokoto and Bolero areas. A total of 4,986 youths were reached in 2023 alone.

Taking advantage of the availability of Rumphu community radio and social media platforms, we developed and aired 41 radio programs on climate change. We also shared 73 articles in form of electronic adverts on social media.

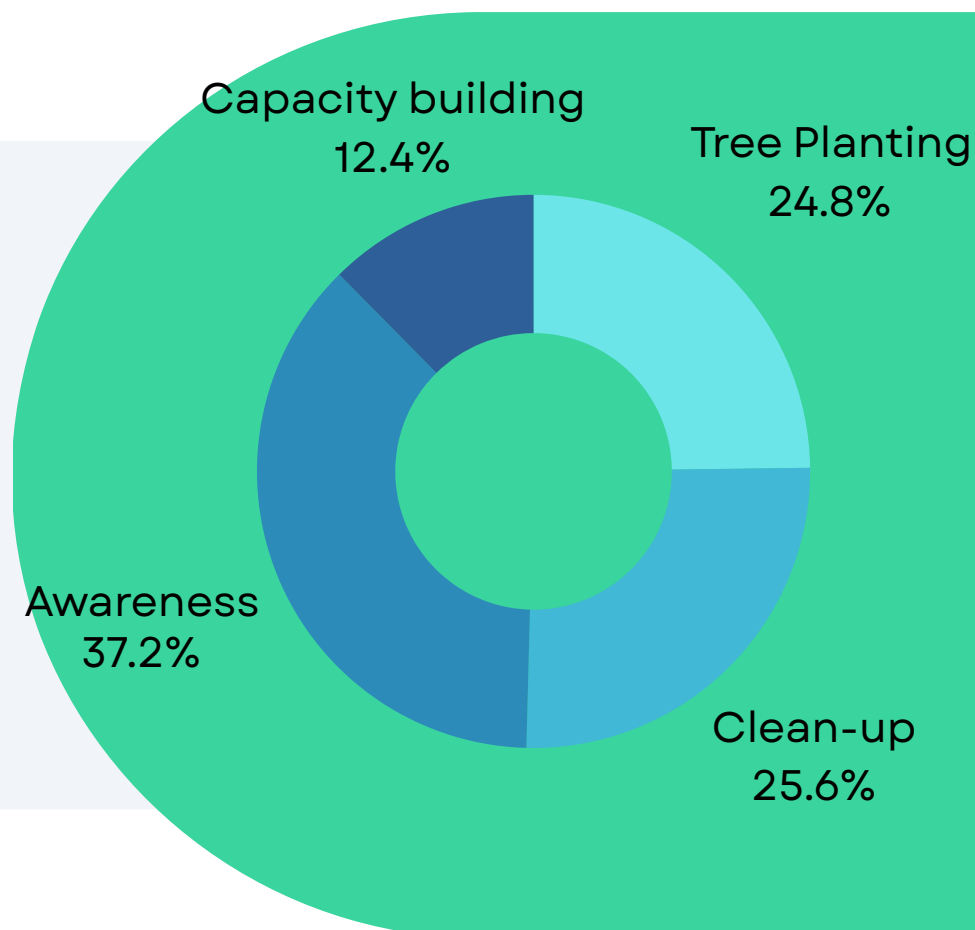

Graph below shows the number of young people reached with our interventions using different channels in 2023
